Aircraft Fuel Coach for Pilots

Simplify Your Fuel Management with Aircraft Fuel Coach

Flying should be about freedom, not fiddling with timers and tank math. Aircraft Fuel Coach for Pilots brings peace of mind to every flight by helping you plan, monitor, and time fuel usage safely and efficiently.

Designed specifically for light aircraft, the app combines three tools every pilot needs: a **Fuel Switch Planner** that creates an optimal switching sequence, a **Fuel Level Tracker** that keeps tabs on each tank and total fuel remaining, and a **Fuel Switch Timer** that alerts you when it's time to change sides.

Everything runs **completely offline**-no accounts, no data collection, no internet required. With a clean, high-contrast dark mode and large cockpit-friendly text, Aircraft Fuel Coach helps you focus on what matters most: flying the airplane.

Available soon on the App Store, Aircraft Fuel Coach is your reliable co-pilot for balanced, stress-free fuel management.
